

Work Group Manager by VI

for Creo® Schematics

The Future of Schematic Design Version Control

Work Group Manager by VI

Work Group Manager by Virtual Interconnect Ltd has been designed for the future of PTC's Windchill and Creo Schematics, allowing the user to have full design control from within Creo Schematics.

Work Group Manager enables fast, accurate access to Windchill, delivering version control and professional document management.

With its extensive array of functions Work Group Manager makes the management of documents and designs as easy and efficient as possible.

All features that were in Work Group Manager (Version Number) have been maintained and new features added to improve the user experience.

Benefits

Work Group Manager provides the designers with extremely valuable information, throughout the design process. This information included but is not limited to Windchill Status, Author, Version, State, Checked Out by, Document Name, Cache size and location,

Maintenance

Our maintenance contract ensures Work Group Manager is kept up-to-date and includes free upgrades and support for complete peace of mind.

Customization

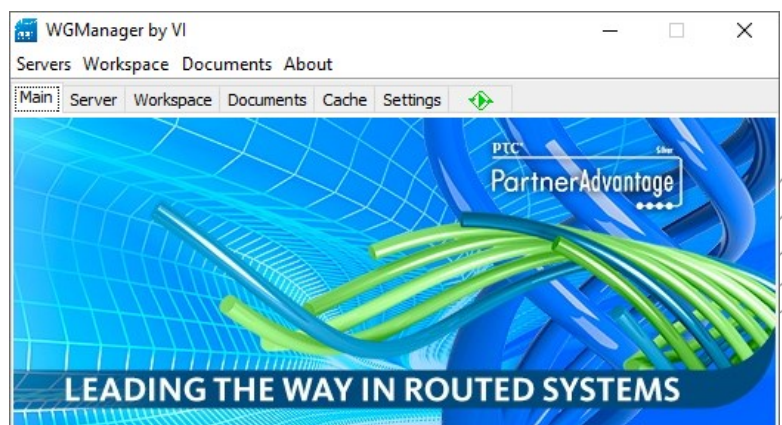

If Work Group Manager doesn't quite meet your needs, talk to us about customization.
